

Assignment 8

Due Date: May 1, 2018 at 7:00 PM

Overview

This assignment will be worth **5%** of your total grade. The goal of this project is to introduce you to React.js.

Specifications

For this assignment, you will need to understand components, props, and JSX.

Profiler

Create a React project called Profiler. The goal of the assignment is to create a very simple web app that displays a picture and lists three hobbies about yourself. This app **MUST** be scalable to easily add new new hobbies and must incorporate good design (i.e. abstracting data from the App.js)

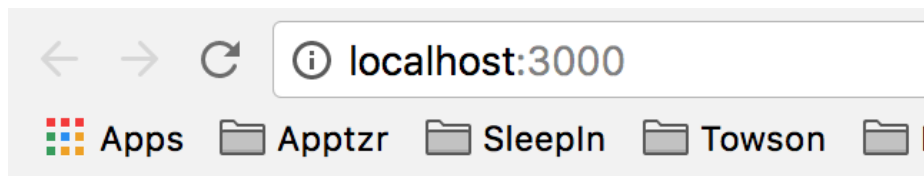

Requirements

- You must have at least three components which are all used (App.js is included)
- All data presented must be written in a JSON blob in index.js (see figure 2)

Submission

Please submit the following on Blackboard:

- profiler.zip

Jal Irani

My hobbies:

- Front-end Web Development
- Back-end Web Development
- Eating Free Food

Figure 1: Example output

```
var data = {  
  name: 'Jal Irani',  
  imgUrl: me,  
  hobbyList: ['Front-end Web Development',  
             'Back-end Web Development',  
             'Eating Free Food']  
}
```
